Dear Zahia,

We are very sorry at hearing that.

We have just one student nominated to the double degree program at ENSCL. Could you consider the possibility of her starting the double degree program in the Summer Semester of 2021?

Best regards and stay safe,

Dear colleagues and friends,

Our jury has just met and we confirm that from September, due to the Brafitec students' situation (no possibility to start in September), our colleagues decided that we will not be able to accept your students either as exchange students (1year) or as double degree students (2 years), since our local logistic situation is very uncertain.

So if there is a possibility to examine the organisation of lab projects from the second semester (January/February), please let me know which students could be interested and I will ask our colleagues if they can propose such projects as an alternative.

In the meantime, would you like me to ask the other Schools of the French network if they can propose a place to your students ?

I hope you understand that our aim is to give the best chances of success to your students.

ps : @Ocileide : we didn't receive Karen's application form, so I presumed she quit.

Kind regards

Zahia Turpin
