

INTERNSHIP – CONSTRUCTION OF WIND AND SOLAR POWER PLANTS

About Total Eren

- ✦ Total Eren is a French-based Independent Power Producer (IPP), dedicated to renewable energy generation, mainly from wind and solar sources.
- ✦ Eren Group was created in France in 2012, by Pâris Mouratoglou and David Corchia, respectively Founder and ex-CEO of EDF EN. Total Eren is a subsidiary of EREN Groupe, a group dedicated to natural resource efficiency.
- ✦ Thanks to its unique track-record in developing new projects and new geographies, Total Eren today owns over 3,300 MW (gross capacity) of renewable energy assets in operation or under construction worldwide, as well as over 2,000 MW of assets under development.
- ✦ Total Eren has renewable energy assets spread over Europe, Central Asia, Asia Pacific, Latin America and Africa.

About Total Eren in Brazil

- ✦ **Eren do Brasil** is the local subsidiary of Total Eren, focusing on the development, construction and operation of solar and wind energy projects.
- ✦ In Brazil, the company's portfolio includes 300 MWp of renewable assets: 50 MWp PV plants already in operation (state of Bahia), a 90 MWp PV plant also in operation (state of São Paulo) and 160 MW wind farms under construction (state of Rio Grande do Norte).
- ✦ The company is constantly looking for new business opportunities in the renewable market in Brazil.

Job Description

Support the decisions regarding the company's solar and wind power plants in Brazil, including the following:

- ✦ Provide technical support to the different company's areas, mainly Procurement, Project Management and Asset Management.
- ✦ Assist in the management of the engineering processes of the projects under construction, including:
 - ☐ preparing tools and presentations to assess the progress of the construction, engineering and regulatory processes
 - ☐ preparing recommendation and actively participating in technical decisions
 - ☐ assist in the management of the relationship with the regulatory electrical/energy agencies
- ✦ Provide technical support to the analysis of the new projects, including:
 - ☐ participating in due diligences
 - ☐ analyzing offers and contracts
 - ☐ providing assistance to the negotiations with the suppliers

Requirements

- ✦ Electrical Engineer – preferably at least one year before graduation;
- ✦ Microsoft Office (Excel, Word, PowerPoint mainly), Autocad skills;
- ✦ Fluent Portuguese and English – you will often use both languages here;
- ✦ No previous experience required, but a demonstrated interest and knowledge in renewable energies is a plus.

Contact
