

The OECD and ANM invite you to the launch of the report: **Regulatory Governance in the Mining Sector in Brazil**

2 February 2022

16:00-18:30 Brasilia time

Via zoom

Mining plays a crucial role in Brazil's economy. Nonetheless, the efforts and resources devoted to regulatory quality in the sector, including the enforcement of rules, have not always been commensurate. This report identifies the gaps, barriers, implementation flaws and inefficiencies in the regulatory framework of the mining sector in Brazil. It takes stock of the recent reforms in the mining sector in Brazil, identifies areas that pose the greatest challenges for effective regulation in mining. It also describes the reforms that created the National Mining Agency of Brazil, its governance arrangements and its current regulatory practices. These are assessed against OECD principles in regulatory policy and mining regulation, as well as against country experiences from Australia, Chile, and Mexico. Finally, recommendations are provided to support further reform efforts.

The OECD and the National Mining Agency are pleased to launch the report **Regulatory Governance in the Mining Sector in Brazil**. We invite you to register for the event and look forward to your contributions.

Launch of the report: Regulatory Governance in the Mining Sector in Brazil Agenda of the Event

**Please join us on 2 February 2022
16:00-18:15 (Brasilia time)**
